SUMMARY

Computer Programming & Analysis student (3.6 GPA) with a proven record of growing revenue and managing vendor and client relationships. Hands-on experience with cloud, data, and AI solutions, which lets me translate technical capabilities into business value. Seeking to build a career in B2B technology sales. Built cloud-native services on AWS, set up GitHub CI/CD pipelines, and handled production support and troubleshooting. Also built several AI-integrated projects, from LLM-powered analytics tools to computer-vision features.

EDUCATION

Seneca Polytechnic

Toronto, ON

Computer Programming & Analysis (Advanced Diploma), CGPA: 3.6

Sept 2023 – May 2026

- President's Honour List, Winter 2024(GPA 3.9); Vice President, Pakistan Students Association

EXPERIENCE

E-Commerce Manager

Sept 2023 – Dec 2024

Grizzly Blades, Ajax, ON

- Ran daily operations on the Magento platform and its backend database, tuning it for reliability and cutting downtime while holding order accuracy at 99% across inventory and order systems through steady monitoring and process controls
- Analyzed sales and market data to sharpen strategy, growing online sales 18% and the customer base 25% in six months, and worked closely with vendors and teammates to turn business needs into dependable system and reporting workflows

Web Developer

Jan 2025 – Apr 2025

Notion Barn, Ajax, ON

- Built a mobile-first dashboard that consolidated multiple data streams, reducing page load 40% and improving client task speed 25%, then led a data migration to Shopify and rebuilt the site to smooth checkout, drop cart abandonment 18%, and lift monthly sales 22%
- Collaborated with designers and developers to revamp the UI, cutting bounce rate 15% and raising engagement 20%, and chased down backend and data-flow bugs to keep the app fast and dependable

PROJECTS

Xeveora Fragments

Sept 2025 – Dec 2025

- Built and deployed a cloud-native fragments/data management service using Node.js, Express, Docker, and AWS ECS/ALB, integrating Amazon Cognito, S3, and DynamoDB for authentication, storage, and metadata persistence with IAM access controls
- Built a GitHub Actions CI/CD pipeline with ECR for automated builds and deploys, plus local test environments (Docker Compose, LocalStack, DynamoDB Local) for safe, repeatable testing

Hotel Management System

Sept 2025 – Dec 2025

- Built a JavaFX desktop system (Java 17, JavaFX, FXML, Hibernate/JPA, H2) with a guest-facing kiosk and admin dashboard for reservations, payments, loyalty tracking, and reporting, using a 3-tier architecture with MVC and dependency injection (Guice); added booking validation, room allocation, exception handling, and CSV/TXT report exports with Log4j2 logging

LegoLand Website

Jun 2024 – Aug 2024

- Built a full-stack web app (Node.js, Express, PostgreSQL, MongoDB, Tailwind CSS) integrating relational and non-relational databases behind a shared backend, designing schemas, tuning SQL queries, implementing authentication, and building responsive, mobile-friendly frontend pages

InsightBoard AI

Feb 2026 – Mar 2026

- Built a full-stack analytics platform (Next.js, TypeScript, React, Tailwind CSS) that turns classroom engagement data into insights for teachers and students, integrating the Gemini API to generate personalized recaps, quizzes, and long-term learning recommendations
- Implemented browser-based computer vision with MediaPipe Face Landmarker (head pose, gaze stability, eye openness, movement tracking) using a privacy-first, on-device approach

TECHNICAL SKILLS

Data & Databases: SQL, MySQL, Oracle, PostgreSQL, MongoDB, DynamoDB, schema design, query optimization, data modeling, data security

Cloud & Platform Ops: AWS (EC2, S3, IAM, ECS, Cognito), Docker, GitHub Actions, CI/CD, Linux, production support, monitoring, troubleshooting

Development: Java, Python, C/C++, JavaScript/TypeScript, Node.js, React, REST APIs, OOP, data structures & algorithms, AI/LLM integration (Gemini), Agile/Jira
